Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: the closest prior art of record (Connelly, U.S. Patent No. 7,020,893 B2) does not teach nor suggest in detail of a method comprising acts of: for each identifier, storing scheduling information that comprises a time when the data from the at least one data source should be added to the data stream for broadcast to the one or more client systems, and wherein the scheduling information further comprises at least one of a retransmission frequency when said data includes static data or a refresh frequency when said data includes dynamic data... in combination with all the elements of each independent claim as argued by Applicant (see pages 15, and 16 of applicant's argument dated July 5, 2006 as well as the enabling portions of Applicant's specification, paragraphs 004-006 of pages 2 and 3; figs 1-3). So as indicated by the above statements, Applicant's arguments have been considered persuasive, in light of the claim limitations, the enabling portions of the specification, as well as the preferred embodiment of the claimed invention.

2. The dependent claims further limit the independent claims and are considered allowable on the same basis as the independent claims as well as for the further limitations set forth.

Art Unit: 2143

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. **Claims 1-44** are allowed, numbered 1 to 44.
